

Mills for Rice, Barley, Maize

The start of your production cycle:
with plants from the specialist.

From Malt to Mash

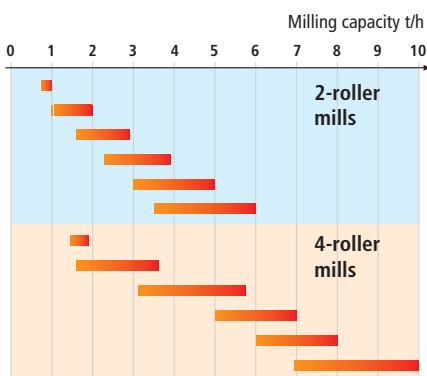

Malt intakes | Silo plants | Conveying equipment | Flat screens | Destoners | Scales | Dust-removal devices | Malt humidification worms | **Grist mills** | Pre-mashing screws | Complete plants

Künzel mills excel by their outstanding compliance with the technological requirements and by their extremely low operation costs, such as reduced power consumption, a long operating life of the rollers, the serviceability and an extremely long service life of the complete system.

Special features of Künzel mills:

- Permanent magnet
- PLC control
- Milling gap setting can be stored
- Sampler for quality controls
- Pneumatic roller disengagement device

Overview of milling capacities:

Our 2, 4 and 6-roller mills are available for processing malt, with capacities ranging from 250 to 14,000 kg.

In addition to grist mills and raw grain mills, Künzel's range of products includes all equipment items for the first process stage of the brewery, from malt intake up to the brewhouse: intake systems, silos, cleaning machines, scales, conditioning screws, conveying equipment, dust-removal systems. These are available as individual components or as complete plants.
